

Date _____**Elf's Name** _____

The Elf above was examined and diagnosed with a severe infection of Reindeer Influenza. This form of Reindeer Flu can not be transferred to humans or pets but precautions must be taken.

The Elf must not be moved for 2 full days. No flying to the North Pole, moving locations, drinking syrup, eating candy canes, dancing and absolutely no mischief. The elf can still take notes during this time and may report back to the North Pole after the 2 days.

Sincerely,
Dr Jeremy Kenter
